Summary

Experienced javascript engineer proficient in React, Vue, Angular and more, looking to serve your company as their new javascript expert. My skills in creativity, programming and technology, coupled with a strong work ethic visible in my entrepreneurial endeavors, makes me confident that I am qualified for the position and would be a great asset to the team. My exceptional programming skills, imagination and passion for technology will help your company achieve their goals of developing high quality, high performance, and scalable web applications.

Experience

JavaScript Developer

AtlanticBT Feb 17 - Present

VP of Engineering

MedSign, LLC Aug 16 - Mar 17

- Provided expertise on system architecture, design, implementation, testing, delivery, and operation of applications.
- Worked directly with the team while analyzing and decomposing complex software requirements for planning and execution.
- Collaborated with the team to manage and estimate the size and complexity of application features.
- Architected frontend frameworks which promoted: Maintainability, Flexibility, Extensibility and Scalability.
- Performed code reviews and automation strategy.
- Wrote maintainable full-stack code while working in a professional software engineering environment.
- Conducted new technology research that provided direction for the enhancement of the overall system and product.
- Contributed to software engineering best practices for design, coding standards, performance, security, delivery, and maintainability.

Web Developer

TheeDesign May 16 - Aug 16

Web Developer

Kruhu Design + Creative Jul 14 - Apr 16

Web Developer

Pilot Design Company Jun 13 - Jul 14

- Developed custom, cutting-edge, browser independent, and responsive websites for clients.
- Used the web's most powerful technologies to create high quality, high performance, and scalable web applications.
- Worked with agile web development projects and participated in daily scrums.
- Improved internal web development processes with innovative ideas and implementation.
- Demonstrated excellent organization skills by tracking and developing several projects simultaneously
- Worked closely with teams of designers and developers to implement web applications for clients.
- Thrived in a fast-paced environment where the need to communicate and adapt were essential to business success.

Web Developer, Database Manager

ActionSportsNow, LLC Sep 10 - May 13

- Architected and developed the ASN website, an ECommerce site with 50,000+ products.
- Managed and maintained the database to the world's largest network of action sports businesses.
- Ensured that storage, archiving, back-up and recovery procedures functioned correctly.
- Created and analyzed custom reports in order to provide the business with accurate and strategic plans of action.
- Wrote database documentation, including data standards, procedures and definitions.

Education

2011 Bachelor's in Management of Information Systems

University of North Carolina, Wilmington
Wilmington, NC

2008 Accepted into UNCW

Cape Fear Community College
Wilmington, NC
